Reinventing Childhood is a new series about the communication of the artist with his past.

Coming of Age Act that explores Flo's predecessors without capturing the mood of their period and challenging the dataistic perception of today's era.

The works are created under an antistrophic propagandistic language that brings the collective into the individualistic way of life.

Fluorescent Pink mesmerizes the viewer and interconnects a ---- plethora of protagonists with a diverse background. It places them Under the theme of childhood and that of a shocking adulthood, -- where heroes survive.
